

# Abstract Shapes

Hello Students!

We have learned about shapes and abstract shapes before! Now it's time to use these shapes to make fun and one-of-a-kind buildings!

**Architects** design amazing buildings, you can too!

First, find buildings around you or buildings in a magazine or book.

## YOUR TASK

1. Cut out each shape, or draw the ones you want to cut.
2. Choose a building you want to abstract using geometric shapes or create your own original design.
3. Using the box, arrange the geometric shapes to create a geometric version of your inspiration. Use your imagination, have fun and channel your inner architect!
